GBS Karotek AS has become NFM Armour AS

By acquiring 51% of the shares, NFM Holding AS recently became major shareholder of the Norwegian company GBS Karotek AS which hereafter will be named NFM Armour AS.

NFM Armour provides vehicle protection, with a specialization in anti-ballistic armouring.

NFM Armour provides tailor-made solutions for operations in complex threat environments.

Today NFM Armour has more than 20 years experience in delivering protection to an international client base and works with a wide range of materials to produce solutions from lightweight armouring to heavy-duty mine protection.

Offerings of NFM Armour

Services

With its own proprietary technologies NFM Armour tenders services in all concerned relevant project fields, including:

- Advisory & Consultancy
- Design & Engineering
- Systems Integration

NFM Armour has more than 20 years of experience delivering ballistic protection to an active international client base, with a focus on customer satisfaction and specialization in vehicles operating as:

- Defence vehicles and systems
- Escort & SUV
- Naval vessels
- Installations

Capabilities

The company's reputation for a high standard of customer satisfaction has attracted prestigious clients and a wide range of landmark assignments across Europe. A fundamental criterion for the company is its engineering competence along with professional, technical and administrative personnel, an international network of partners and a comprehensive range of technical facilities.

NFM Armour will custom-design solutions according to anticipated threat level, operational and climatic conditions for vehicle operations.

Although manoeuvrability is crucial for safety, this is often compromised to cut costs or realize short-term gains. Through expert application of the proper ballistic materials, NFM Armour provides ideal solutions that meet operability requirements without compromising safety.

Lightweight

State-of-the-art composites and ceramic materials have contributed to NFM Armour's reputation in the armouring market. This secure high protection is combined with a lower weight penalty, sustainable manoeuvrability resulting in low fuel consumption and less maintenance compared to traditional systems and this will give reduced life cycle cost

Long-lasting ballistic armouring based on R&D from NFM Armour is currently protecting clients throughout all of Europe.
